Christopher Roseman

Retirement
September 2026

After more than two decades of dedicated service, the Lucas County Board of Developmental Disabilities proudly recognizes Chris Roseman on his retirement.

Chris began his career with the Board in June 2002, as a Maintenance Repair Worker at the Transportation Center, the area that is now the Administrative Building. Throughout his 24 years of service, he supported operations at the Telegraph Adult Services Center and later returned to the Administrative Building in 2008 when Capital Projects became mobile.

Over the years, Chris became a trusted and invaluable member of the team. His extensive knowledge of building and vehicle maintenance, strong work ethic, and willingness to step in wherever needed made him a go-to resource for colleagues across the agency. Whether solving complex maintenance issues or tackling tasks beyond his assigned responsibilities, Chris consistently demonstrated professionalism, dependability, and a commitment to excellence.

Chris's dedication has played an important role in ensuring Lucas DD facilities, vehicles, and operations remained safe, efficient, and reliable. His contributions have supported not only the day-to-day work of the organization but also the mission of improving life so that individuals with developmental disabilities reach their full potential.

As Chris begins this well-earned new chapter, we extend our heartfelt gratitude for his years of service, loyalty, and countless contributions to the Board. His presence, expertise, and friendly spirit will be greatly missed.

Congratulations on your retirement, Chris! Thank you for 24 years of outstanding service, dedication, and going above and beyond for our organization. We wish you happiness, good health, and many exciting adventures in the years ahead.
